OEM (INFORMATION) BULLETIN

STELLANTIS FPW 9.55535/10

The Union of the European Lubricant Industry (UEIL) is the umbrella association of the European Lubricants Industry, representing their members and, in particular, the interests of SMEs and independent lubricant companies. To date, the UEIL represents more than 450 lubricant companies, who manufacture and distribute lubricant products under their own various trademarks throughout the European Union. With members in 21 European Countries and a unique collective experience of lubricants and the lubricants market, UEIL is the sole representative body for independent manufacturers of lubricants in Europe and has been recognised as such by the European Commission. It is UEIL's policy to favour free and fair competition within the scope of prevailing EU and national laws.

Summary of the case

The UEIL Technical & Competition Committee (TCC) was contacted by UEIL members on their difficulty to obtain a suitable technology required for updated Stellantis FPW9.55535/10 engine crankcase oil specification in accordance with EU legislation on access to repair and maintenance information. The OEM has updated this specification to replace multiple other FCA and PSA engine oil with a single revised fluid.

This follows current and ongoing activity with this OEM related to what appears to be one or two companies who have the necessary approvals whilst many have been unable to access the required technology and approval.

Status of the case

Following previous communication and discussions between the UEIL TCC and Stellantis, the required documents have been made available from the OEM. The TCC contacted four major technology suppliers which would have the capability and chemical expertise available to partner with UEIL members, whom they could subsequently contact.

Conclusion

We are pleased to share that market general technology from a leading additive company is available for UEIL members wo wish to supply Stellantis FPW9.55535/10-approved engine oil.

The UEIL TCC is pleased to share the FPW 9.55535/10 standard at this link.

The UEIL TCC thanks all its members who were involved in this case.
