DOOSAN BOBCAT HYDRAULIC SPECIFICATION

The Union of the European Lubricant Industry (UEIL) is the umbrella association of the European Lubricants Industry, representing their members and, in particular, the interests of SMEs and independent lubricant companies. To date, the UEIL represents more than 450 lubricant companies, who manufacture and distribute lubricant products under their own various trademarks throughout the European Union. With members in more than 22 European Countries and a unique collective experience of lubricants and the lubricants market, UEIL is the sole representative body for independent manufacturers of lubricants in Europe and has been recognised as such by the European Commission. It is UEIL's policy to favour free and fair competition within the scope of prevailing EU and national laws.

In June 2015 a member copied the Table of Recommended Lubricants from an Owner's Manual to UEIL, which gave Internationally recognised Specifications for the various products required for use in Doosan Bobcat equipment; except for the Hydraulic Oil.

For the Hydraulic Oil it stated "Hydraulic oil change interval is 2,000 hours, only when DOOSAN Genuine Oil is used. If other brands of oil are used, guaranteed change interval is 1,000 hours."

As is normal practice with OEMs from Asia, UEIL initially contacted their local distributors, unfortunately without success.

Therefore, various e-mails were sent to the OEMs World Wide Headquarters in Seoul, Korea and although an initial response was received, UEIL were unable to progress the issue.

Finally, contact was made with the OEM's EAME Headquarters who responded promptly to our enquiry and advised that Doosan Hydraulic Oil met the Internationally recognised Specification of DIN 51524 PART 3 HVLP.

UEIL would like to thank the Doosan Bobcat's EAME Headquarters for their assistance in resolving this enquiry.

Brussels, October 2017
