

# presents 2019-2020 Industry Statistics

The global COVID-19 pandemic has caused a major shock to the European economy, posing an unprecedented challenge to all sectors of our economy. Now more than ever, businesses need to base their decisions and future strategies on data analysis. Market data are fundamental to a better understanding of industry trends and market dynamics that is key to underpinning business planning decisions.

The European lubricant industry statistics published by UEIL comprise official data from countries where they are made available supplemented by valid and reliable data estimates based on a sophisticated algorithm for the remaining countries. The data are available for purchase in Excel format as well as in an analytical Summary Report.
