EOBUS BLATT 18.000-029 SPECIFICATION

The Union of the European Lubricant Industry (UEIL) is the umbrella association of the European Lubricants Industry, representing their members and, in particular, the interests of SMEs and independent lubricant companies. To date, the UEIL represents more than 450 lubricant companies, who manufacture and distribute lubricant products under their own various trademarks throughout the European Union. With members in more than 22 European countries and a unique collective experience of lubricants and the lubricants market, UEIL is the sole representative body for independent manufacturers of lubricants in Europe and has been recognised as such by the European Commission. It is UEIL's policy to favour free and fair competition within the scope of prevailing EU and national laws.

In April 2021, UEIL wrote to Daimler Truck AG informing them that UEIL members had raised the issue of a lack of information regarding the EvoBus Blatt 18.000-029 specification. In this letter, we requested the technical specification to ensure that members could meet Daimler Truck AG requirement when they supply a product for their equipment.

After long discussions with Daimler buses services, we can inform you that:

- The EvoBus Blatt 18.000-029 specification does not exist anymore;
- When Daimler Truck AG documents refer to the above specification, products meeting MBT 227.61 specification have to be used.

We thank Daimler Truck AG for this clarification.
