Country Data Collection Categories

The coloured categories indicate the allocation of those categories to the summaries on the country pages. Blue is Automotive; green is Industrial/Other.

Some countries do not report exactly in line with these categorisations. Where necessary EuropaLub has made editorial judgements.

- 1) ENGINE OILS
 - 1 A Gasoline or diesel engine oils for passenger cars
 - 1 A1 First fill gasoline or diesel engine oils for passenger cars
 - 1 B Diesel engine oils for commercial and industrial vehicles
 - 1 B1 First fill diesel engine oils for commercial and industrial vehicles
 - 1 B2 Multipurpose diesel oils used in farm tractors and construction
 - 1 C Two-stroke engine oils
 - 1 D Other engine oils (including aviation engine oils)
- 2) GEAR OILS AND TRANSMISSIONS
 - 2 A Automatic transmission fluids (ATF)
 - 2 B Automotive gear oils
 - 2 C Industrial gear oils
 - 2 D Hydraulic and transmission oils (including fire-resistant fluids)
 - 2 D1 Shock absorber oils
- 3) GREASES
 - 3 A1 Automotive greases
 - 3 A2 Industrial greases
- 4) METALWORKING OILS
 - 4 A Quenching oils
 - 4 B Neat oils for metalworking
 - 4 C Soluble oils for metalworking
 - 4 D Rust prevention products
- 5) HIGHLY REFINED OILS
 - 5 A Turbine oils (excluding aviation applications)
 - 5 B Electrical oils used in transformers (including cable oils)
- 6) OTHER OILS
 - 6 A Compressor oils
 - 6 B General machine lubricants
 - 6 C Other industrial oils for non-lubricating purposes
- 7) PROCESS OILS
 - 7 A Process oils (excluding aromatic extracts)
 - 7 A1 Technical white oils
 - 7 A2 Medicinal white oils

[Home](#) > [FLI Articles](#) > [Quarter Three 2017](#) > [UEIL strives to drive sustainability in Europe](#)

Serra-Holm highlighted two main ambitions for the remaining 18 months of her presidential term. There is increasing discussion on sustainability throughout the lubricant industry; Serra-Holm wants UEIL to become the driver for the industry in terms of sustainability — to guide the process of what sustainability entails throughout Europe.

Last October, UEIL made the decision to integrate EuropaLub into the organisation. EuropaLub was the body producing statistics for the union, previously operating independently but with UEIL's support. The incorporation of EuropaLub into UEIL is a significant change; UEIL is now directly responsible for delivering statistics for the industry, of paramount importance for the association's interactions with different stakeholders.

Serra-Holm wants to continue to further develop the work done in this area producing "reliable, trustworthy industry statistics." She says, the development and documentation of information on our industry is critical so we can "convey knowledge to our stakeholders."
