VALTRA OILS SPECIFICATION G2-08

The Union of the European Lubricant Industry (UEIL) is the umbrella association of the Independent European Lubricants Industry, representing their members and, in particular, the interests of SMEs and independent lubricant companies. To date, the UEIL represents more than 400 lubricant companies, who manufacture and distribute lubricant products (and coolants) under their own various trademarks throughout the European Union. With members in more than 20 European Countries and a unique collective experience of lubricants and the lubricants market, UEIL is the sole representative body for independent manufacturers of lubricants in Europe and has been recognised as such by the European Commission. It is UEIL's policy to favour free and fair competition within the scope of prevailing EU and national laws.

UEIL has previously issued bulletins in June and November 2012, concerning the Valtra Oils Specification G2-08, in which the membership was advised that a "Suitable for Use Formulation" was commercially available.

We can now advise that the Original Equipment Manufacturer, AGCO Limited, have confirmed that the membership of UEIL can in future claim that the "Suitable for Use Formulation" available from an additive company, meets the performance requirements of Valtra G2-08.
